

Network Digital Signage

MPEG4-AKR-NET03

Digital signage need not be a costly business. This low cost media player provides all the benefits of systems costing significantly more to buy, setup and manage. Remote management of content may be performed over LAN with the Client Administration Tool (CAT) or over the internet with iCAT. You have the choice of renting server space or setting up your own server and developing your own network. It provides media audit reports essential for content delivery verification.

Media Player features include:-

- Outputs: VGA, Composite, S-Video, Component
- Audio: 2ch Stereo
- Storage: Compact Flash card
- Power: 12V Mains adapter
- Software: CAT, 1yr Support, RSS Ticker Feed, OEM Splash Screen
- Options: 1 year RTB
- Part no.: MPEG4-AKR-NET03

Content Management made simple

Client Administration Tool (CAT) and internet CAT (iCAT) provide a simple and easy user interface for defining network configuration, playlists and manage media to be distributed over the player network. It offers the ability to:-

- ① Create, delete and manage player groups, locations etc
- ① Create, delete and manager players
- ① Monitor player status, updates and login
- ① Manage media, local, FTP and HTTP sources
- ① Create modify or delete dynamic ticker (RSS feed) or static text ticker
- ① Create, modify or delete playlists
- ① Programme playlist by day, date, time, and group
